MCS COOKS RIVER INTERMODAL RAIL TERMINAL REDEVELOPMENT

MCS is planning on undertaking redevelopment works in the first half of this year. The redevelopment works involve the resurfacing of some of the Cooks River Terminals main roadways, an upgrade to the site drainage network, installation of new light towers and modifications and extensions to the rail sidings layout.

MCS anticipates that the construction works will commence early February 2012, The works will be undertaken in staged manner across our terminal in order to minimise the impact on operations and ensure business continues as usual.

We will provide further updates on the location of the works closer to the commencement date of the construction works. To assist Transport carriers during this time, MCS intends to provide regular updates via 1 - stop and MCS web site www.mcs-aus.com on location of works, changes to traffic flow, loading/unloading areas and any restricted areas.

Should you have any operational issues once our works commence, the following MCS personnel can be contacted with your concerns:

- John Hull – Terminal Manager - 0417497765
- Bernie Miles – Terminal Supervisor – 0408165045
- Sam Nastasi – Night Terminal Supervisor – 0402853351
- Luke Stocks 0420958571 or Steven Hartas 0438431905 on the Project Management team.

We ask for your understanding and patience during this time of our redevelopment and we assure you that we will do our very best to keep delays to a minimum.
